EXECUTIVE SUMMARY

ECE undergraduate with a minor in Business Data Analytics, skilled in full-stack development using React, .NET, and SQL Server. Experienced in building web applications with frontend, backend, and database integration. Strong problem-solving ability with hands-on internship and project experience, seeking entry-level developer roles.

PROJECTS

College Conference Website | HTML, CSS, JavaScript, Node.js, MySQL (Oct 2025)

- Developed a responsive conference website using HTML, CSS, and JavaScript.
- Implemented user registration, login, and a dashboard for paper submission and status tracking.
- Built an admin dashboard to manage registrations and approve or reject submissions.
- Developed backend services with Node.js and Express
- Integrated with MySQL for data storage.

Intelligent Pesticide Sprinkler - Web Application | React, Flask, REST API, ESP32 (March 2026)

- Built a bilingual (Tamil & English) React web application for farmers to upload crop images, view AI-based disease detection results, and remotely trigger pesticide spraying.
- Developed a live sensor dashboard displaying real-time data from soil moisture, temperature (DHT22), and ultrasonic sensors via REST API calls to a Flask backend.
- Part of a hardware-software system; solely responsible for the web application layer, collaborating with the hardware team on ESP32 controller integration.

Smart Wheelchair | Wokwi, ThingSpeak, Unity (AR Foundation), Power BI (Nov 2024)

- Created a software-based smart wheelchair simulation for obstacle detection.
- Simulated IoT data using Wokwi and monitored data through ThingSpeak.
- Developed an AR visualization using Unity to demonstrate wheelchair movement.
- Analyzed system data using Power BI for performance insights.

INTERNSHIP EXPERIENCE

Full Stack Developer Intern - Conprg Technologies (Jan 2026)

- Built web applications using React (frontend)
- Designed responsive user interfaces with React
- Used JSON for data exchange between frontend and backend
- Performed database operations using SQL Server

Python Web Development Intern - Pemchip Infotech (July 2025)

- Developed small Python-based projects, including a typing practice application.
- Built basic frontend pages such as a login interface using HTML, CSS, and JavaScript.
- Implemented simple backend logic in Python to handle user input and application flow.
- Gained practical experience in debugging, code structuring, and basic web application workflows.

TECHNICAL SKILLS

Programming: C Programming, Python

Web Technologies: HTML, CSS, JavaScript, Tailwind CSS, React

Backend: Node.js, .NET

Databases: MySQL, SQL Server

Concepts: REST APIs, JSON

Tools and platforms: Docker, Google Antigravity, VS Code, Git/GitHub, ThingSpeak, Blynk IoT Platform, Wokwi Simulator, Unity (AR Foundation), Power BI, IoT

EDUCATION

Thanthai Periyar Government Institute of Technology, Vellore | 2022-2026

B.E. Electronics and Communication Engineering (ECE) | CGPA: 7.93

Minor: Business Data Analytics

CERTIFICATIONS

1st Prize in Intercollege Hackathon – TPGIT | 2026 - Built an AI-powered chatbot using n8n

HTML, CSS and JavaScript - LinkedIn Learning | 2025

Excel 2024 Essential Training (Office 2024 LTSC) - LinkedIn Learning | 2025

C Programming Certification | 2026

Intercollege Hackathon Participant - TPGIT | 2024

State Level Paper Presentation - Arunai Engineering Colleg8e | 2023
